PROFILE

Through my internship and academic projects, I had the opportunity to work on real-world challenges and develop a **solution-oriented mindset**. I enjoy both understanding business needs and thinking about the best way to **transform them into clear, reliable, and useful applications**.

Thanks to my **internship and academic projects**, I was able to work on real full-stack applications, from **backend** development to **frontend** implementation, **database** management, and **automated testing**. This experience allowed me to strengthen both my technical skills and my **ability to deliver complete, production-oriented solutions**.

I am particularly interested in backend development, while also having hands-on experience with frontend development and automated testing gained during my internship. **Today, I am looking for a Full-Stack Developer position**, with a strong **focus on backend** development but remaining **open to frontend and testing-related work**.

To learn more about my background, projects, and achievements, feel free to explore my [portfolio](#).

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER INTERN | OPAL SOLUTIONS, MONT-SAINT-GUIBERT

feb 2025 - Jun 2025

Technical Tools : React • TypeScript • Node.js • Express.js • PostgreSQL • Prisma ORM • OpenAPI • Cypress • Docker

During my internship, I worked on a system aimed at **simplifying and centralizing the management of IP access rights** for the company's internal and external services.

I added a feature that allows the company to **track, store, and update access permissions more easily, making it clear which user has access to which services**. This replaced a more manual process and helped reduce errors while making updates faster and more reliable in daily use.

I also worked on **restoring and improving the company's automated testing system after a technical migration**, ensuring tests could run properly again and **help detect issues earlier** in the development process.

SALES ASSISTANT | TOURNESOL BAKERY & PASTRY, EVER

Aug 2020 - Dec 2020

- Customer service and order management
- Inventory management
- Opening and closing of the store

PROJECTS

SITE WEB PROFESSIONNEL - FOLIODEV.

1 Week | Apr 2026

Technical Tools : Javascript • React • Vite • TailwindCSS

Creation of a **personal portfolio** to centralize my projects, skills, and experiences in a clear and accessible space, beyond the limitations of a traditional CV.

Design of a modern, responsive, and intuitive interface to **present my work** in a more concrete way, improve the readability of my background, and provide better visibility into my technical skills and working approach.

FULL-STACK DEVELOPER FOR BETTERBUSINESS — FINAL YEAR PROJECT (ACADEMIC TEAM PROJECT)

2 Weeks | Dec 2024

Technical Tools : Angular • TypeScript • Python • Django ORM • Django REST Framework • PostgreSQL • Chart.js • Docker • REST APIs

Development of an evaluation platform enabling companies to assess their eligibility for quality labels through an automated scoring system.

Contributed to the **implementation of business logic related to score calculations**, the **creation of clear data visualizations to simplify result interpretation**, and the design of a smooth and **intuitive user experience**.

Also **collaborated** on the development of additional platform features, particularly around **contract management and contract signing**.

EDUCATION

BACHELOR'S DEGREE IN COMPUTER SCIENCE, SOFTWARE DEVELOPMENT (CYBERSECURITY OPTION)

HAUTE ÉCOLE LÉONARD DE VINCI, BRUSSELS
(2024 - 2025)

TECHNICAL TOOLS

	Strong Experience	Working Knowledge
Languages	Java, TypeScript	C, C#, JavaScript, Python, Dart, PHP
Framworks	Express.js, React.js, TailwindCSS	.Net, Spring, Angular, Django, Flutter, Bootstrap
Databases	PostgreSQL, Prisma DB(ORM)	Django ORM, MongoDB
Tools	Git, Docker, Cypress, JUnit, Bash, Vite	Maven, Terraform, Ansible, Chart.js
Additional Skills	REST API, OpenAPI, UML(Modeling)	DevOps, Cybersecurity
